

With AAC Now! you can install CoughDrop and Forbes AAC Premium Boards on any available household or workplace device!

CoughDrop Premium Boards

Developed by speech-language pathologists with extensive AAC experience, AAC Now! premium boards include: CoreWord™, Symbol Links, QuickCore Pro, Phrase Links, Vocal Flair Pro, Sequoia Pro, and more.

Quick Core Pro

Quick Core Pro is a tailored core vocabulary set customized by Forbes AAC currently available in the following layouts: Quick Core Pro 12, 24, 40, 60, 84, and 112. This set promotes the use of core vocabulary while adding common fringe options and provides the opportunity to expand communication benefiting from a consistent motor plan. With so many words in so few button presses, a communicator can gradually discover and learn motor pathways for what they want to say.

Vocal Flair Pro

Vocal Flair Pro is a large vocabulary set with a main page that is primarily flat-but-dynamic core, and links to additional categorized support words. Customized by Forbes AAC, this Pro set includes a Fitzgerald color coding color scheme and SymbolStix image options beyond what the basic Vocal Flair offers. It's currently available in the layouts 24, 40, 60, 84, 84 keyboard, and 112. A collection of context-specific categories is included, and additional categories can easily be added or adjusted based on the needs of the individual communicator. Vocal Flair is built to be consistent for a developing communicator, while also being robust enough to grow with them grammatically.

Symbol Links

Symbol Links is a board set designed for those who benefit from the use of picture symbols in their communication set. Symbol Links is offered in the following layouts: Symbol Links 4, 8, 12, 20, and 30. It provides essential support for those who rely on symbol-based communication systems with vocabulary organized by category enabling users to find their words quickly.

CoreWord™

The CoreWord Language System provides AAC users with a powerful combination of core language, fringe vocabulary and banks of key phrases. The language system is divided into three distinct levels that correspond with vocabulary layouts: CoreWord 6, 20 and 40. The CoreWord Language System features dynamic vocabulary layouts that automatically change as the user makes selections. Once a word has been selected, the layout updates to show only words that are likely to be used next. By offering these next words in plain view and removing unwanted vocabulary, users don't have to waste time and energy searching for their next words, ensuring maximum efficiency with a minimal learning curve.

Phrase Links

Phrase Links is a board set designed for literate AAC users who prefer to utilize pre-made phrases. Select a button from the grid and open a number of additional options relating to that subject. The main board includes several quick-fire phrases used often in conversation like "yes," "no," "please," and "thank you." A keyboard is included for spelling and literacy and boards can be customized with personal or preferred information.

Sequoia

Sequoia 15 Pro is a branching vocabulary set, built in an effort to support communication organized by pragmatic function but with the goal of encouraging expansion into generalized and core-oriented vocabulary. Customized by Forbes AAC, this Pro set includes a designer color scheme and SymbolStix image options beyond what the basic Sequoia 15 offers.
