

Four sizes, for any user!

The ProSlate series. The **first iOS-based** speech-generating devices.

The AAC devices in our iOS-based line are capable of handling all of your communication needs by utilizing the latest and greatest of any AAC app. Our four sizes and rugged accessories and engaging color options add function and style - all with the best warranty in the industry.

Make sure to see the options for sizes and colors on our website.

Best Industry Warranty

When users choose a ProSlate™ device, we include a five year worry-free warranty to protect them against damages that may occur. This means no waiting for funding for repairs and no gap time between upgrades.

Patented FlexABLE® Handle and Stand

Included with each device, the FlexABLE handle and stand is an ergonomic innovation that solves positioning and handling needs. Regardless of the level of dexterity, the patented design provides infinite angle adjustment.

The wearable SoundPOD™ Speaker Module

Voice output can come directly from the person rather than the device! The SoundPOD™ magnetically docks to the back of the device and can also be removed and attached to the neck lanyard and be worn by the user.

SnapLock™ Keyguards

Our keyguards feature a corner grip design that easily snaps in place and locks onto the device. The corner grips yield a satisfying “snap” sound when installing to confirm positive attachment success. Purpose-built for our ProSlate™ line, the quarter inch thick guards prevent unwanted selections and come in a variety of layouts.

ProSlate Series Forbes AAC

ProSlates come in four sizes and are available in several colors. Check the website for details.

Front and rear facing cameras

With front and rear facing cameras, you can quickly shoot photos of rooms, objects and people. Photos can quickly be placed on vocabulary cells to customize pagesets.

Wireless switch access

Access the ProSlates' applications using ability switches such as Buddy Buttons, Leaf switches, sip and puff switches and more.

Choose any AAC app

When users order a ProSlate™, they can pick the AAC software of their choice from the iOS store.
