

The ProSlate™ 13 with Enable Eyes® iOS-based ProSlate with eye tracking !

Introducing our latest eye gaze solution for AAC users! The ProSlate™ 13 with Enable Eyes® incorporates cutting-edge eye tracking technology while providing access to all the iPad offers, including access to various communication software apps and other user favorites such as Facebook messenger, iMessage, and many more.

This dedicated speech-generating device weighs in at only 3.82 lbs. The Enable Eyes module and onscreen assistive touch icon allow you to access all the functions of the IOS platform, including single tap, double tap, drag, scroll and zoom, using only your eyes.

As with other devices offered through Forbes AAC, the ProSlate 13 with Enable Eyes incorporates the CoreWord™ language system, FlexABLE® Handle and Stand and SoundPOD™ wearable speaker.

Shown with the iOS start page

Patented FlexABLE® Handle and Stand

Included with each device, the FlexABLE handle and stand is an ergonomic innovation that solves positioning and handling needs. Regardless of the level of dexterity, the patented design provides infinite angle adjustment.

The wearable SoundPOD™ Speaker Module

Voice output can come directly from the person rather than the device! The SoundPOD™ magnetically docks to the back of the device and can also be removed and attached to the neck lanyard and be worn by the user.
