

Run a Smart TV with a WinSlate!

InfraRed for all.

Built into each and every WinSlate is a powerful infraRed controller. The IR controller can send signals to control virtually *any IR device* used for work or play so Forbes AAC is offering a **55" Vizio TV**. It comes complete with a compatible WinSlate Gridset and all the set up and configuration that gets users up and watching television in no time!

WinSlate users can take full control of using the WinSlate's built in transmitter and grid sets. Control power, volume and navigate menus, just like a remote using any access method.

We also offer a complete range of environmental control items via the IR module, such as door openers, bed controllers, lights, etc.

Smart TV Grid Set is included in the WinSlate Dashboard
